Our group

CIGRE Cyprus workshop on
Electricity markets and power system operations

January 26, 2026

Industry engagement

UK: co-optimization in balancing capacity markets

Belgium: dynamic reserve dimensioning, scarcity pricing

Sweden: reserve dimensioning on networks, scarcity pricing

SDAC/ACER/JRC: EUPHEMIA labs, co-optimization of energy and reserves, capacity expansion

Germany: comparison of capacity remuneration mechanisms and scarcity pricing for green transition of EU system until 2050

India: prototyping of power exchange algorithm

Colombia: analysis of transition from self dispatch to central dispatch

Greece: analysis of balancing market under the Target Model, scarcity pricing proposal, renewable curtailments

Israel: review pricing algorithm

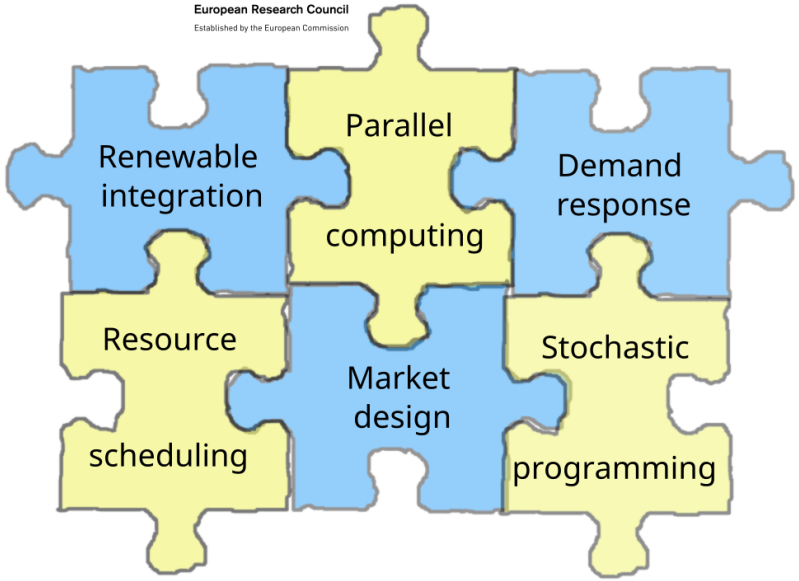
Research activity

Research problems and methodology

ICEBERG: Transmission / distribution coordination

Bodossaki foundation scientific awards

ENGIE chair, ColorPower

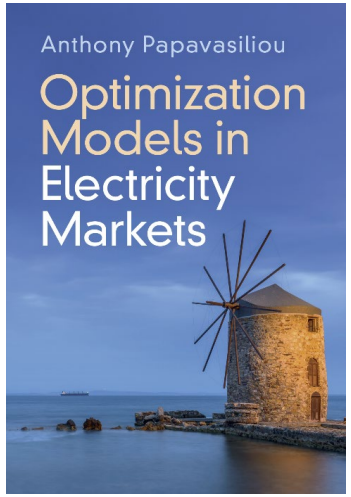


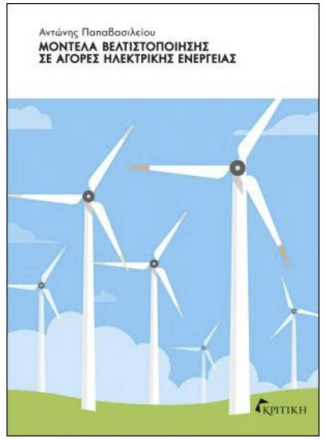
AI applications in energy

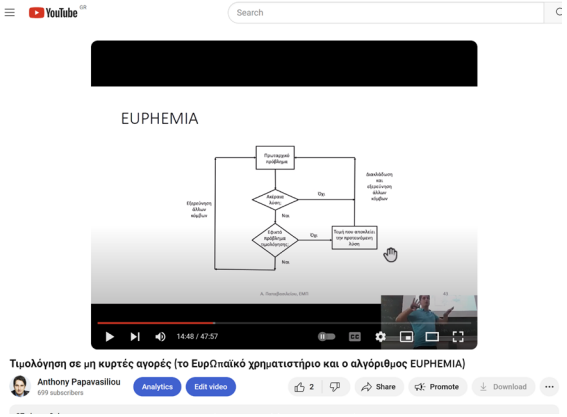
FEVER: Flexibility pltforms

Scarcity pricing

Francqui foundation research professorship 2018-2021

Teaching activity






- **Teaching** of electricity markets, energy economics and optimization at NTUA
  - Renewal of material for courses on
    - (i) Power system economics (BSc and MSc)
    - (ii) Energy economics (BSc and MSc)
    - (iii) Power system reliability (BSc)
    - (iv) Mathematical programming (BSc)
  - Book published by Cambridge University Press (English) and Kritiki (Greek)
  - Uploaded **all** lectures on Youtube channel: https://www.youtube.com/channel/UCQ93V9jWitDLS8Bf9ItzHEw
  - Slides, additional exercises, errata: https://ap-rg.eu/courses/optimization-models-in-electricity-markets-book/
- Industry trainings: SDAC, ENTSOE, CEER, …
  - https://ap-rg.eu/arktos/
